GЕОTOP, Université du Québec à Montréal, QC, Canada

Rendez-vous international sur la gestion intégrée de l'eau - 2016

### La plus catastrophique crise biologique de tous les temps :

on avançait jusqu'ici les chiffres de 70 à 77 % des familles de vertébrés terrestres comme n'étant plus représentées après la crise, et 63 % de diminution du nombre des familles d'insectes représentées (Lethiers, 1998).

<http://geologie.mnhn.fr/>

Texte portant sur la limite Permien-Trias (250 Ma)

The fresh water Living Planet Index shows that on average the **abundance of populations monitored in the freshwater system has declined by 81 %** between 1970 and 2012

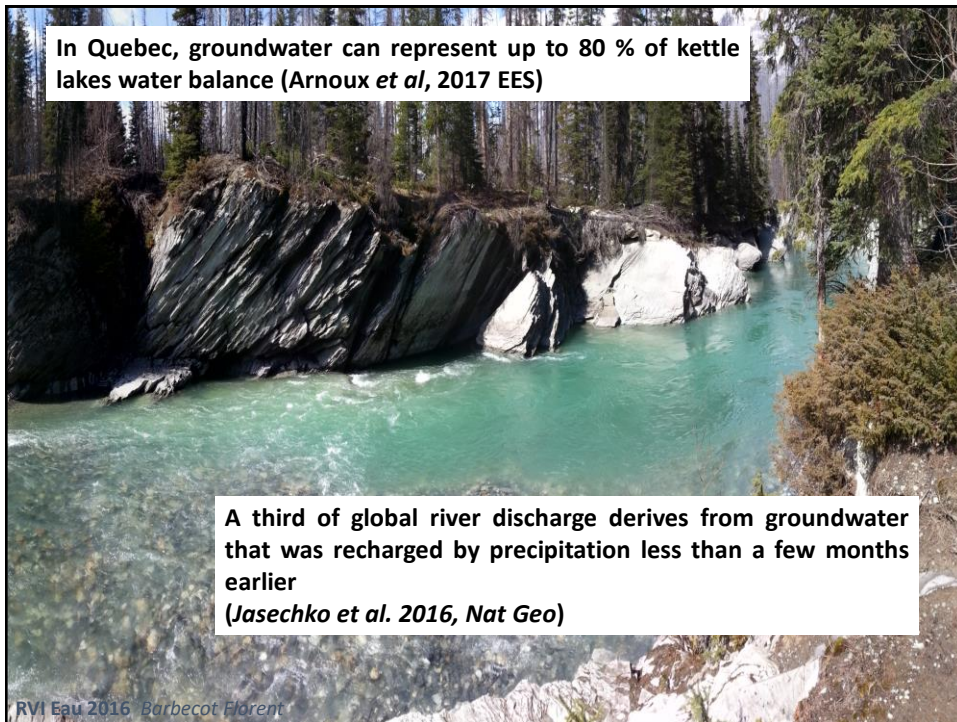

Oct. 2016

Groundwater ages [kyears]

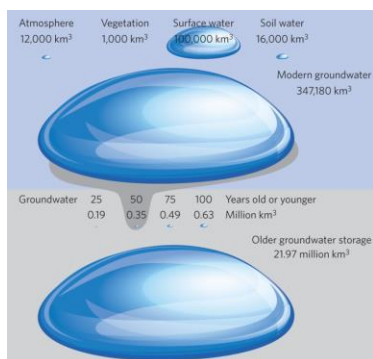

- 6 samples were dated
- Error < 10% with one exception
- Age range : 0.2-1 Mio years

Sturchio, N. C., Z. T. Lu, R. Purtschert, B. E. Lehmann, M. Sultan, L. Patterson, X. Du, P. Mueller, T. Bigler, K. Bailey, T. P. O'Connor, L. Young, R. Lorenzo, Z. El Alfi, B. El Kallouby, Y. Dawood, and A. M. Abdallah. 2004. One million year old groundwater in the Sahara revealed by krypton-81 and chlorine-36. Geophys. Res. Lett. 31.

### How much and how old?

(Gleeson et al. 2016)

RVI Eau 2016 Barbecot Florent

### Volumes of groundwater stored in the global water cycle

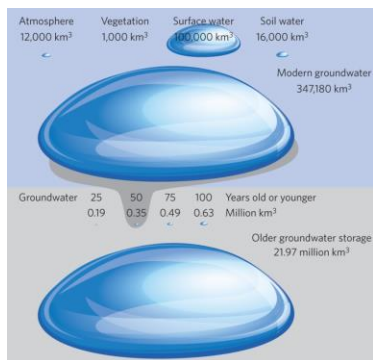

### Fluxes of groundwater stored in the global water cycle

UQAM Faculté des sciences

### How much and how old?

(Gleeson et al. 2016)

More than 60 % of groundwater fluxes correspond to RT lower than 100 yrs

### % Volumes of groundwater stored in the global water cycle

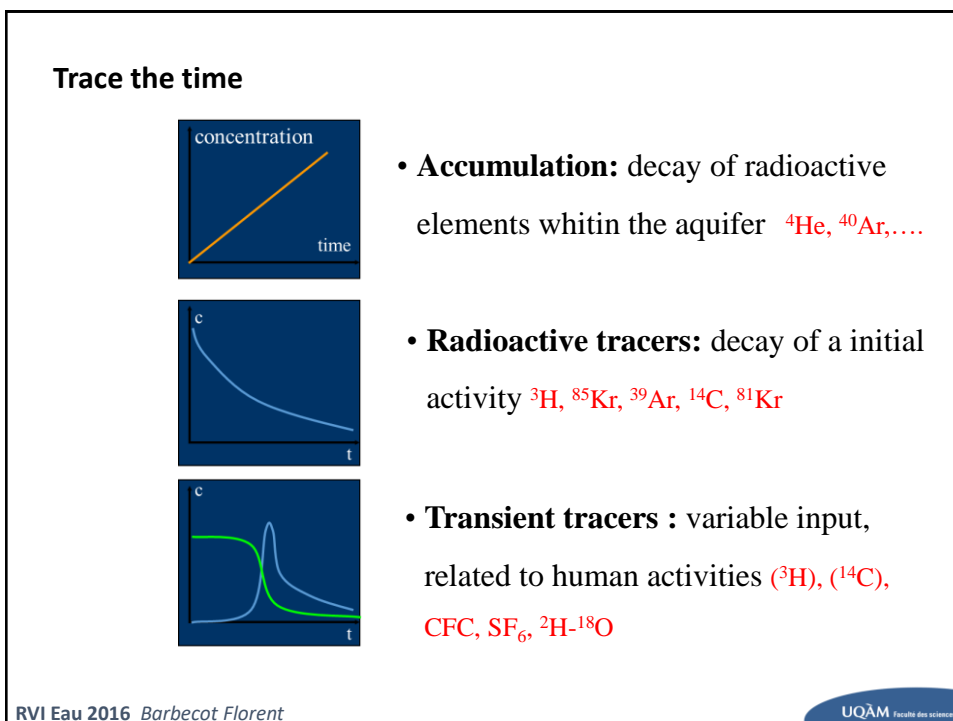

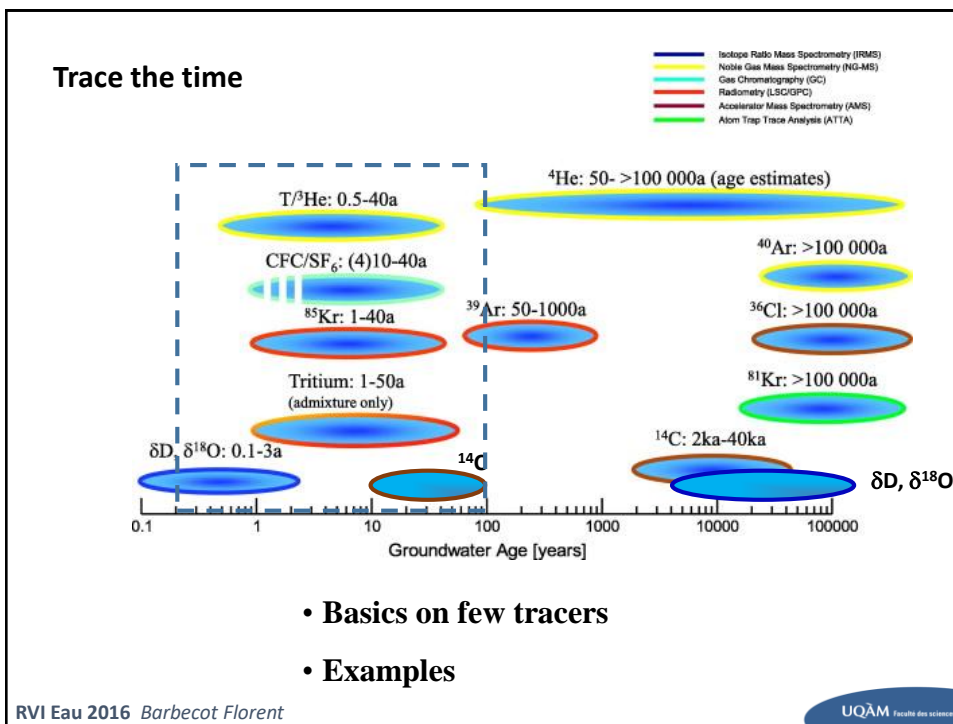

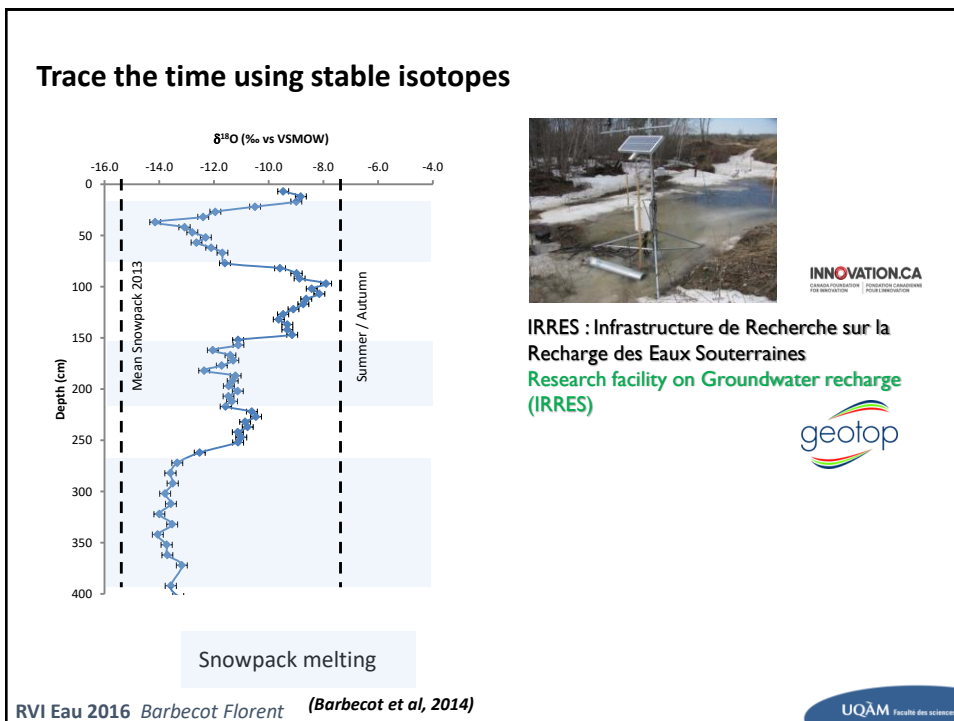

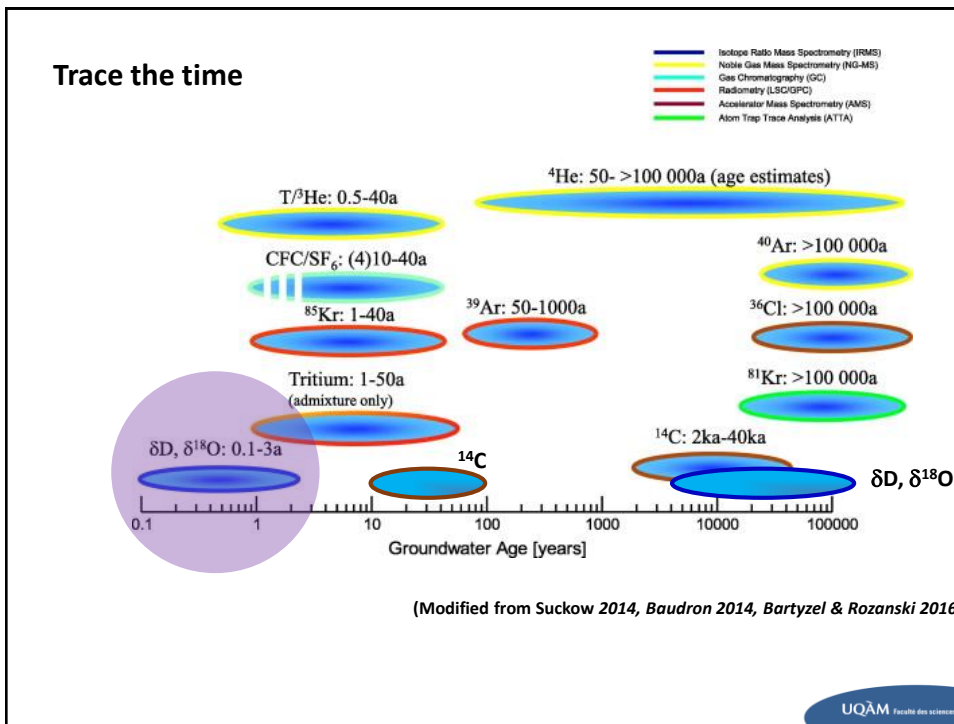

### Fluxes of groundwater stored in the global water cycle

### Trace the time

RVI Eau 2016 Barbecot Florent

UQAM Faculté des sciences

*Sampling the USZ in the Paris Basin*

**Origin and composition of excess air**

Classical model: Complete dissolution of entrapped air bubbles  
 ⇒ composition of excess air = composition of atmospheric air

water + air

air entrapment

compl. dissolution

Excess pattern

$C_i = C_i^{eq}(T, S, P) + Az_i$       A: Concentration of excess air

**From W. Aeschbach-Hertigb**

• USZ buffer the atmospheric variability ( $[SF_6]$  and T)

*(Klump et al, 2008; Corcho et al, 2007; Goody et al 2006)*

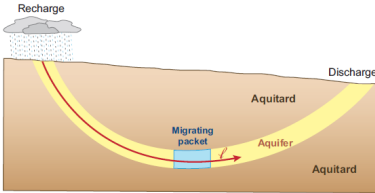

RVI Eau 2016 *Barbecot Florent* UQAM Faculté des sciences

## Trace the time, not the age !

**Tracer "Age"**

RVI Eau 2016 *Barbecot Florent* UQAM Faculté des sciences

Recharge

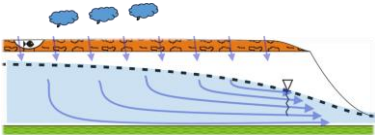

Discharge

Aquitard

Aquifer

Migrating packet

**My age is 400 kdays  $\pm 1$**

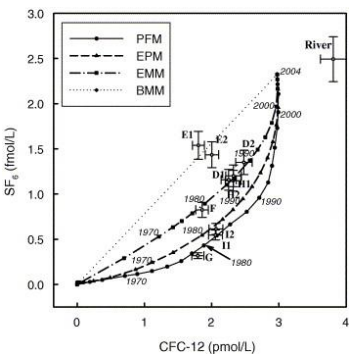

**The Rvi eau assembly "age" is a nonsense**

**Don't use AGE s.s., consider the age distribution and Mean Residence Time for managing resources**

RVI Eau 2016 *Barbecot Florent*

UQAM Faculté des sciences

**Determine flow types and recharge areas**  
*Chalk catchment in southern England*  
 2 tracers, 10 samples

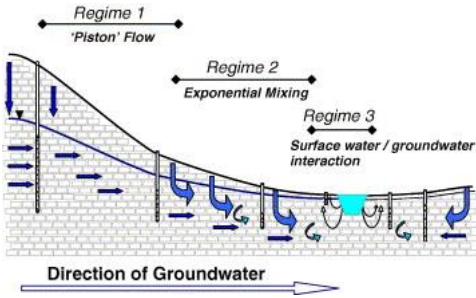

SF<sub>6</sub> (mol/L)

CFC-12 (pmol/L)

Legend: PFM (solid line), EPM (dashed line), EMM (dotted line), BMM (dash-dot line)

Sample dates: 1970, 1971, 1972, 1973, 1974, 1975, 1976, 1977, 1978, 1979, 1980, 1981, 1982, 1983, 1984, 1985, 1986, 1987, 1988, 1989, 1990, 1991, 1992, 1993, 1994, 1995, 1996, 1997, 1998, 1999, 2000, 2001, 2002, 2003, 2004

Regime 1  
'Piston' Flow

Regime 2  
Exponential Mixing

Regime 3  
Surface water / groundwater interaction

Direction of Groundwater

**Modern groundwater residence time changes in a highly anthropized watershed**

- 2 tracers
- + Variable recharge rates
- + Variable tracers input

(P. Baudron et al, 2013)

RVI Eau 2016 Barbecot Florent

UQAM Faculté des sciences

“ages” of 25 yrs, ..50 yrs..

Significant only if :  
age + a distribution (age structure)

As same mean age may lead to different issue

+

≠

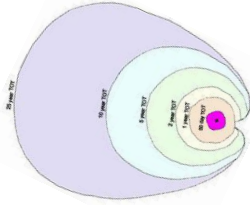

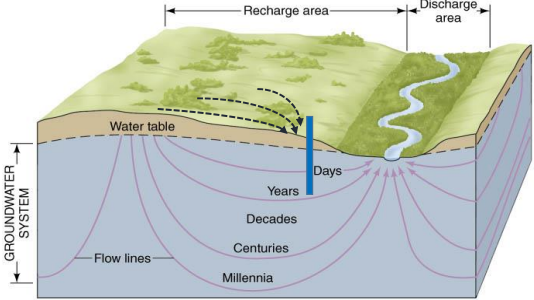

2

**Envir'eau PUIITS**

**TechnoRem**

RVI Eau 2016 *Barbecot Florent*

Trace flow stratification and subsample for discrete age measurements

**Envir'eau PUIITS**

**TechnoRem**

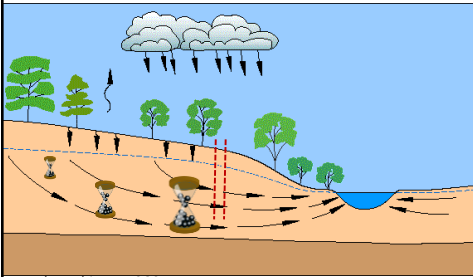

*Modifié de GA, Kazemi, « Groundwater age »*

RVI Eau 2016 *Barbecot Florent*

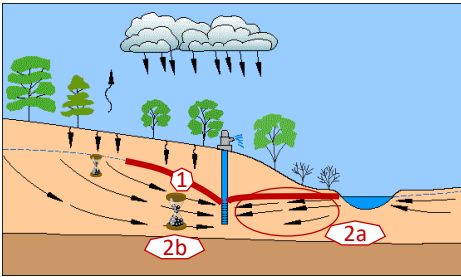

## Ongoing projects

### Human induced long term change on groundwater flow

#### État naturel

#### Pompage

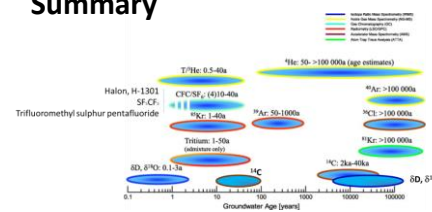

Fond graphique: USGS

1. Baisse du niveau de nappe
2. Modification des écoulements
  - a. Origine de l'eau (Qualité...)
  - b. Âge (Qualité...)

Combined use of GW dating and isotopes tracing of water origin

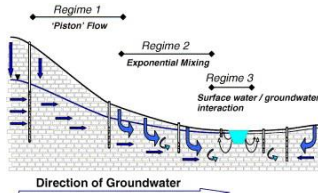

RVI Eau 2016 Barbecot Florent

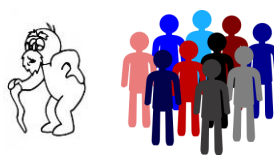

### Summary

#### A complete set of tracers in the perfect range of MRT

#### Avoid "age" for GW Use "Mean Residence Time"

#### Evidence, characterize hidden pathways

GW management gain from age structure identification

RVI Eau 2016 Barbecot Florent
